

LUCKY

The object of the game is to set the hand with as many natural 8's and multi-card 8's as possible.

To begin, make an ANTE and the optional Lucky 8 wager.

Cards are scored as follows: The 9's and 10 value cards are removed from the deck. Jokers count as Natural 8. Aces count as 1 and all other cards count as face value.

Players set their hands of 8, then decide to:

- FOLD and lose the ante or**
- Make an "In to Win Bet", EQUAL to the ante.**

Dealer sets their hand 'house way' and qualifies with one NATURAL 8 or JOKER.

Player WINS 1 to 1 on the ANTE and In to Win wagers if they have more 8's than the dealer.

- DISCARDS WILL BE COUNTED IN THE EVENT OF A TIE**
- FEWEST DISCARDS WIN.**
- TIES LOSE TO THE HOUSE.**

IF THE DEALER DOES NOT QUALIFY:

- ANTE IS PAID 1 TO 1.**
- IN TO WIN WILL PUSH.**

LUCKY 8

Pays on the total number of NATURAL 8's and/or JOKERS in the player's hand per posted pay table.
